

Dear there

This month, we are not just talking about innovation, here at [PlektonLabs](#), we are living it! Our team was on the ground at DTW Ignite in Copenhagen, proudly showcasing [Infinity!](#)

Whether you watched from the Innovation Arena, explored the Industry Showcase or visited us at our Catalyst Kiosk, one thing is clear: the future of monetization is here, and it is powered by APIs.

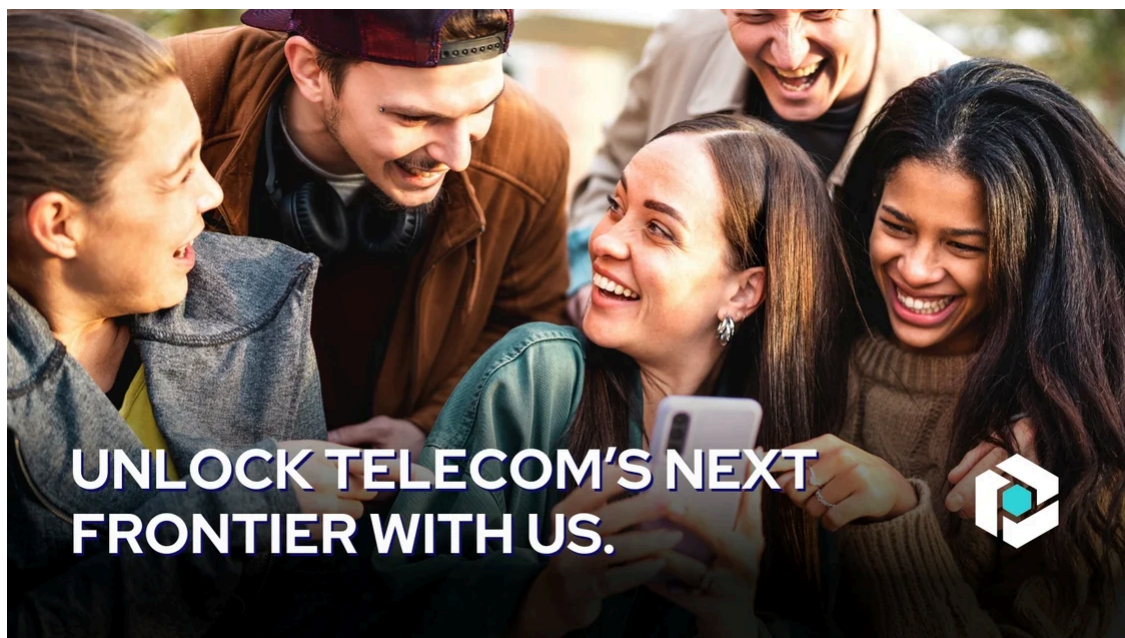

Don't miss the latest [leadership article](#) by our CEO, Wahid Mohammad, published by **TM Forum** where we break down dynamic pricing and why it matters now more than ever.

Dynamic pricing is reshaping the telecom landscape, and at PlektonLabs, we're leading the charge, forging new partnerships while deepening our impact with existing clients.

We couldn't be prouder of the energy, grit and teamwork that brought Infinity to life.

Warm Regards,
The Visionaries at PlektonLabs

Our Telecom Landing Page is Live.

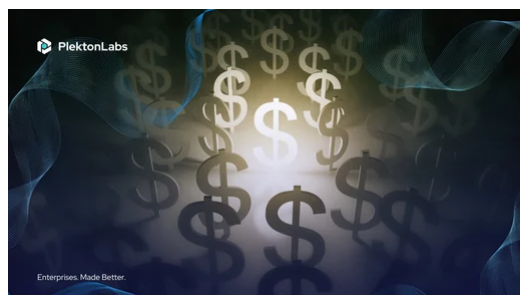

You asked for telecom innovation that doesn't play it safe. We built it.

Introducing our new [Telecom Industry Hub](#), where real-time APIs, dynamic pricing, and scalable integration collide to help CSPs dominate their markets.

We've been behind the scenes helping [telecom leaders grow faster, scale smoother, and innovate ahead of the curve](#). This isn't just a landing page. It's your unfair advantage.

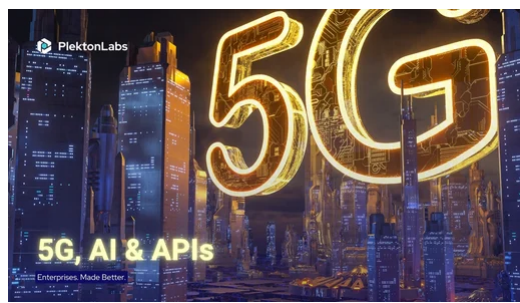

👉 Break the Telecom mode, [see how we're helping CSPs now!](#)

MONTHLY BLOG POSTS

[A Dynamic Pricing Strategy from a Quality-on-Demand Perspective](#)

Dynamic pricing and **Quality on Demand** are revolutionizing the telecom industry, powering adaptive networks, personalized services, and new revenue streams.

[5G, AI & APIs: The Triple Force Reshaping Telecom Innovation](#)

Discover how AI-powered APIs are the game-changing tools driving real-time service delivery, dynamic monetization, and the smarter networks **CIOs** envision.

PLEKTON PULSE

Jahidur Rahman

Senior Staff Engineer

We caught up with **Jahid**, one of the brains behind [Infinity](#), to hear how he keeps our systems smart, scalable, and ready for whatever's next.

What's your day to day like?

I split my time between hands-on coding, reviewing architecture, and helping guide our tech direction. It's a mix of deep focus and team collaboration.

Biggest challenge on Infinity?

Balancing speed and stability, especially when building a high performance platform that integrates with diverse APIs.

How do you tackle tough problems?

Break it down! Understand the why. Bring in different perspectives. And don't be afraid to whiteboard it out.

Key takeaway from Infinity?

Design for change, even if you're not implementing it yet. Modular, flexible systems win in the long run.

What do you love about working at PlektonLabs?

The culture. It's all about ownership, curiosity and pushing boundaries together.

Surprise fact?

Rain or shine, I hit the football field every Saturday. It's my weekly reset button before jumping back into the code.

HEALTHCARE INTEGRATION EXPERTS

We're not saying it's live yet... but healthcare is about to get a signal boost.

Designed for medical device leaders, digital health innovators, and IT decision-makers who are tired of fragmented systems and stalled data flows.
