

Dear there

This month at PlektonLabs we're leaning into what makes digital ecosystems strong: rock-solid [API security](#) (because in today's world, leaving your API unguarded is like leaving your front door wide open) and [composable architecture](#) (because agility and scalability are no longer nice-to-haves, they're survival tactics).

We're also shining the spot on one of our own: **Gary Shanks**, who's celebrating 4 years with us! His dedication and impact are part of what keeps our engine running, and you'll catch his story in this month's PlektonPulse.

What's PlektonPulse, you ask? It's where we highlight the amazing people behind our projects. Each month, we feature a team member whose work adds vital "pulse" to everything we do, and this month, **Gary** takes center stage.

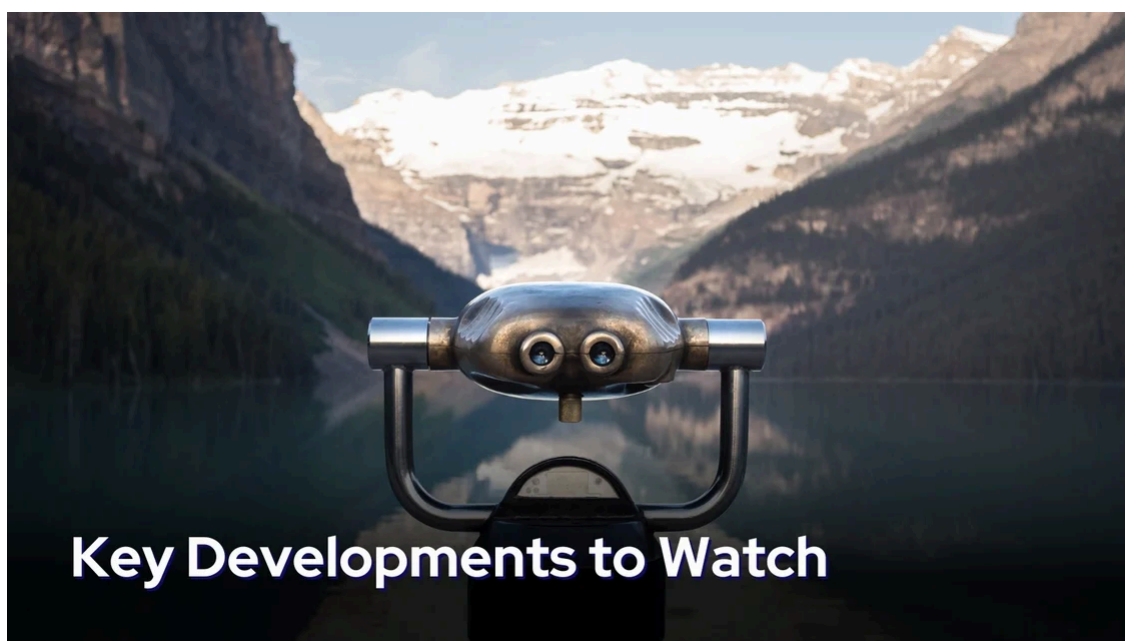

And speaking of pulse - we've got plenty of momentum building! Quietly gearing up for big things, and behind-the-scenes, we're busy elevating the experience for our clients with **new landing pages** tailored to key verticals and a **sleek design refresh** to sharpen our edge.

Big ideas and bold moves are only part of the story, we're committed to continuous innovation not just through the solutions we deliver but through the culture we build.

As **Plektonites**, we know that real progress happens when collaboration and forward thinking go hand in hand. **Thanks for being part of that momentum.**

Warm Regards,
The Visionaries at PlektonLabs

INDUSTRY NEWS AND TRENDS

Composable Architecture & API Security: 2025 Priorities for IT Leaders

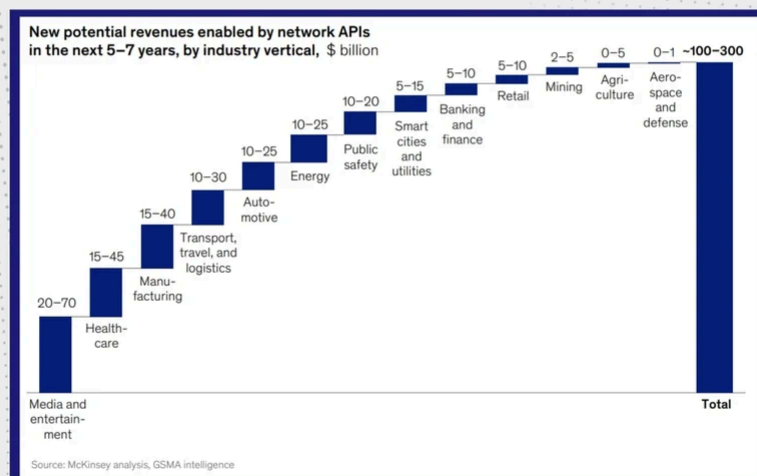

In 2025, North American enterprises are doubling down on API security and composable architecture. With [57%](#) of organizations reporting API-related breaches, the shift toward **AI-driven, behavior-based threat detection** and **security mesh frameworks** is critical. These methods protect APIs at scale, addressing complex attack surfaces and business logic vulnerabilities.

Meanwhile, composable architecture is gaining momentum, enabling modular, agile system design. IT leaders are leveraging this model to accelerate innovation, improve interoperability, and future-proof their digital ecosystems.

For CTOs and CIOs, the message is clear: Secure, adaptable architectures aren't optional—they're foundational.

PLEKTON PULSE

Gary Shanks

Director of Sales

Four years with Gary means four years of sharp strategy, technical excellence, and a whole lot of project wins. As a cornerstone of enterprise integration, Gary blends deep expertise with business savvy, helping clients navigate complexity and achieve real results. We couldn't resist picking Gary's brain (slipping in a few questions) to celebrate this milestone!

What has stood out in your time at PlektonLabs? The sheer depth of talent and collaboration here. It's rare to join a team where innovation constantly exceeds expectations.

Your take on aligning sales and marketing?

"True alignment happens when everyone understands and agrees on the path to the future, not just what we're offering today."

Advice for newcomers to tech?

"Tech is a launchpad, learn fast, stay curious, and doors will open."

What might surprise your colleagues about you?

"Despite its rarity these days, I've been married to the same woman for 47 years - and she still talks to me!"

PlektonLabs MuleSoft Professional Services

POWERING SEAMLESS INTEGRATION THROUGH EXPERTISE AND INNOVATION

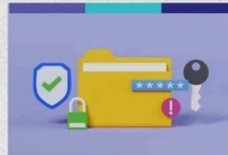

Strategic Advisory & Architecture Review

Align IT architecture with business goals and reduce complexity.

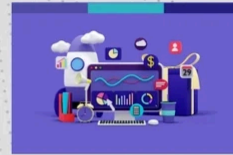

Catalyst Launch Program

Kickstart MuleSoft adoption with fast, fixed-cost delivery.

Implementation & Delivery

End-to-end integration with secure, scalable execution.

Mule 3 to Mule 4 Migration

Seamless upgrades with minimal downtime and optimized performance.

LET'S BUILD SOMETHING POWERFUL TOGETHER

Unlock the full potential of MuleSoft with our expert-led, end-to-end solutions.

We drive fast adoption, smooth migrations, and lasting results—simplifying your integration every step of the way.
